

MANUAL CLAMPS

Hold-Down Action

MODELS 548, 578, 588

These are the largest capacity hold-down units, designed for fast cycling and accurate repeatability. They incorporate the patented “bar-guide” feature which gives lateral support to the hold-down bar at the front of the base. This extra support improves rigidity and repeatability. The clamps can be welded in place, attached by side mounting or clevis mounted. All models are supplied with red vinyl handle grip. Hold-down bar can be machined to meet the application requirements.
